

## Central Freight Lines Imaging Retrieval Web Service

We do not have an actual web service available, per se. It can be achieved, however, with a valid Central Freight Lines PRO number and a couple of HTTP GET requests.

GET -- pronumber

(1) [www.centraalfreight.com/tyco/query.asp?proNumber=561867318](http://www.centraalfreight.com/tyco/query.asp?proNumber=561867318)

This will return XML. From that, you can parse out the following:

- (2) Retrieve ImageID(s) attributes to retrieve list.
- (3) Within ImageID elements there are FieldValue elements.
- (4) Look for attributes FieldName with values of "custDOC\_TYPE"
- (5) FieldValue has "DR" (proof of delivery) or "BL" (bill of lading)
- (6) For each "ImageID" that you find and/or need, issue HTTP GET:

[www.centraalfreight.com/tyco/view.aspx?imageid=95514344](http://www.centraalfreight.com/tyco/view.aspx?imageid=95514344)

The image stream returned is in TIF format.
